

**Standard Operating Procedures Manual  
Radiological Emergency Preparedness  
Monroe County Emergency Management**

<b>Section:</b>	<b>29</b>	<b>TURKEY POINT</b>
<b>Subject:</b>	<b>1800</b>	<b>PROTECTIVE ACTION DECISIONS</b>
<b>Date:</b>	<b>2/20/2020</b>	

**1.0 PURPOSE:**

To establish a procedure for guiding decision makers in interpreting protective action recommendations for emergencies at the Turkey Point Nuclear Plant (TPNPP).

**2.0 GENERAL:**

- 2.1 The Monroe County Administrator or his/her designee (Monroe County Emergency Management Director) is responsible for selecting and implementing protective action decisions (PADs) to protect the health and safety of the residents of and visitors to Monroe County in the event of an incident at TPNPP.
- 2.2 If an accidental airborne release of radioactive materials occurs from a nuclear power plant, three main pathways exist for a person to receive a radiation dose during the release period:
  - i. External exposure to the released plume
  - ii. External exposure from any radioactive material deposited on the ground from the plume
  - iii. Inhalation of radioactive material from the plume
- 2.3 In an unexpected release of radioactive material, FPL shall calculate a projected dose to estimate the potential level of exposure an individual would receive if no protective actions were taken.
- 2.4 The Environmental Protection Agency’s Protective Action Guide (PAG) manual, 2017, details thresholds at which projected doses to individuals trigger the need for protective actions.
- 2.5 If a General Emergency is declared, FPL shall utilize these PAGs to make protective action recommendations (PARs), which shall be reviewed by the BRC. Monroe County decision-makers are **not** bound by FPL’s recommendations. FPL will not provide PARs at other emergency classification levels.
- 2.6 FPL may recommend that affected populations evacuate, shelter-in-place or monitor and prepare. PARs shall include an area description in the form of “miles down wind” and “downwind sectors affected”. The EOC designates the locations to be evacuated in geographic areas.
- 2.7 Pre-scripted EAS and WEA messages have been created to expedite the dissemination of information to the public and the implementation of protective actions in the ten mile Emergency Planning Zone (EPZ).
- 2.8 The decision diagram contained in this procedure provides a cross-reference for PADs and pre-scripted EAS and WEA messages that provide the public with the emergency information needed to initiate the desired protective action.

<b>Section:</b>	<b>29</b>	<b>TURKEY POINT</b>
<b>Subject:</b>	<b>1800</b>	<b>PROTECTIVE ACTION DECISIONS</b>
<b>Date:</b>	<b>2/20/2020</b>	

- 2.9 Monroe County shall coordinate the PAD selection and implementation of response activities with Miami-Dade Emergency Management and the Florida Division of Emergency Management (FDEM). The group must demonstrate unity in the presentation of their decisions to the public and the media. The “message” must be consistent and free of contradictions.
- 2.10 This procedure assumes that TPNPP emergencies will develop gradually, therefore giving response agencies sufficient opportunity to activate response facilities such as the Monroe County Emergency Operations Center (EOC) and Florida Power & Light (FPL) Emergency Operations Facility (EOF).

**3.0 DECISION-MAKING PROCESS**

- 3.1 FPL shall hold briefings at the EOF and identify the current emergency classification level. The Tavernier and Miami-Dade EOCs shall be on a conference bridge during EOF briefings.
- 3.2 If a General Emergency is declared, FPL shall make PARs.
- 3.3 Monroe County decision-makers at the EOF shall consider the PARs and make use of FPL technical advisors and Bureau of Radiation Control specialists to validate PARs and make PADs. Monroe County decision-makers are **not** bound by FPL’s recommendations.
- 3.4 The Monroe County decision-makers shall identify the appropriate EAS and WEA messages to disseminate to the public and media via the decision diagram below.
- 3.5 The Tavernier and Miami-Dade EOCs will confirm the EAS and WEA message selection and initiate the response operations needed to support the PAD.
- 3.6 Any variation between the EAS and WEA messages and the previously selected protective actions must be discussed among all the decision-makers prior to messages being released. Previously agreed upon decisions may require modification in order to be brought into compliance with an existing EAS message.
- 3.7 Once all parties are in agreement about PADs, the EAS and WEA messages and press releases shall be disseminated to the public and media at a predetermined time in coordination with Miami-Dade.

**4.0 EMERGENCY ALERT SYSTEM (EAS) MESSAGE SELECTION**

- 4.1 The Monroe County decision-maker shall refer to the Decision Chart at the end of this document and follow the solid line to locate the first part of the EAS Message. The choices will be EAS 1, EAS 2, or EAS 3. **Every subsequent EAS Message must be**

<b>Section:</b>	<b>29</b>	<b>TURKEY POINT</b>
<b>Subject:</b>	<b>1800</b>	<b>PROTECTIVE ACTION DECISIONS</b>
<b>Date:</b>	<b>2/20/2020</b>	

**preceded by one of these messages.**

- 4.3 The information on EAS 1 is also available in press release form. The press release version should be considered when no PAD is to accompany it.
- 4.4 Proceed down the chart answering the questions posed. The chart will direct you to the correct combination of EAS messages needed to describe the protective action measures that the public should take.
- 4.5 The decision to declare a local state of emergency is somewhat subjective. Generally, it is not required until the declaration of a Site-Area Emergency at the Plant, but the IC may choose to enact a local state of emergency at any point in order to “free up” County resources and initiate emergency powers.
- 4.6 Many PARS include a combination shelter-in-place and an evacuation component. When this is the case, base your EAS message selection on the evacuation component of the PAR.
- 4.7 EAS 18 references the distribution of Potassium Iodide (KI) at reception centers when determined by the Department of Health. The decision to issue KI is made by a separate decision-making organization (Florida Department of Health) but this protective action decision is still included in the “Decision Making Chart” to assist with EAS message selection.
- 4.8 Copies of the EAS messages are maintained electronically and in a binder labeled “Turkey Point EAS”. There are 5 copies of the binder, with the following distribution: (1) Planning Section Chief’s Turkey Point Activation Procedure Book, (2) Monroe County Emergency Management Director’s Turkey Point Activation Procedure Book, (3) Radiological Emergency Preparedness Administrator, (4) EOF PIO, (5) FDEM.

**5.0 WIRELESS EMERGENCY ALERTS (WEA) SELECTION**

- 5.1 WEA messages shall be selected based on PARs and be approved by IC prior to transmission.

**6.0 EAS & WEA TRANSMISSION AND PUBLIC NOTIFICATION**

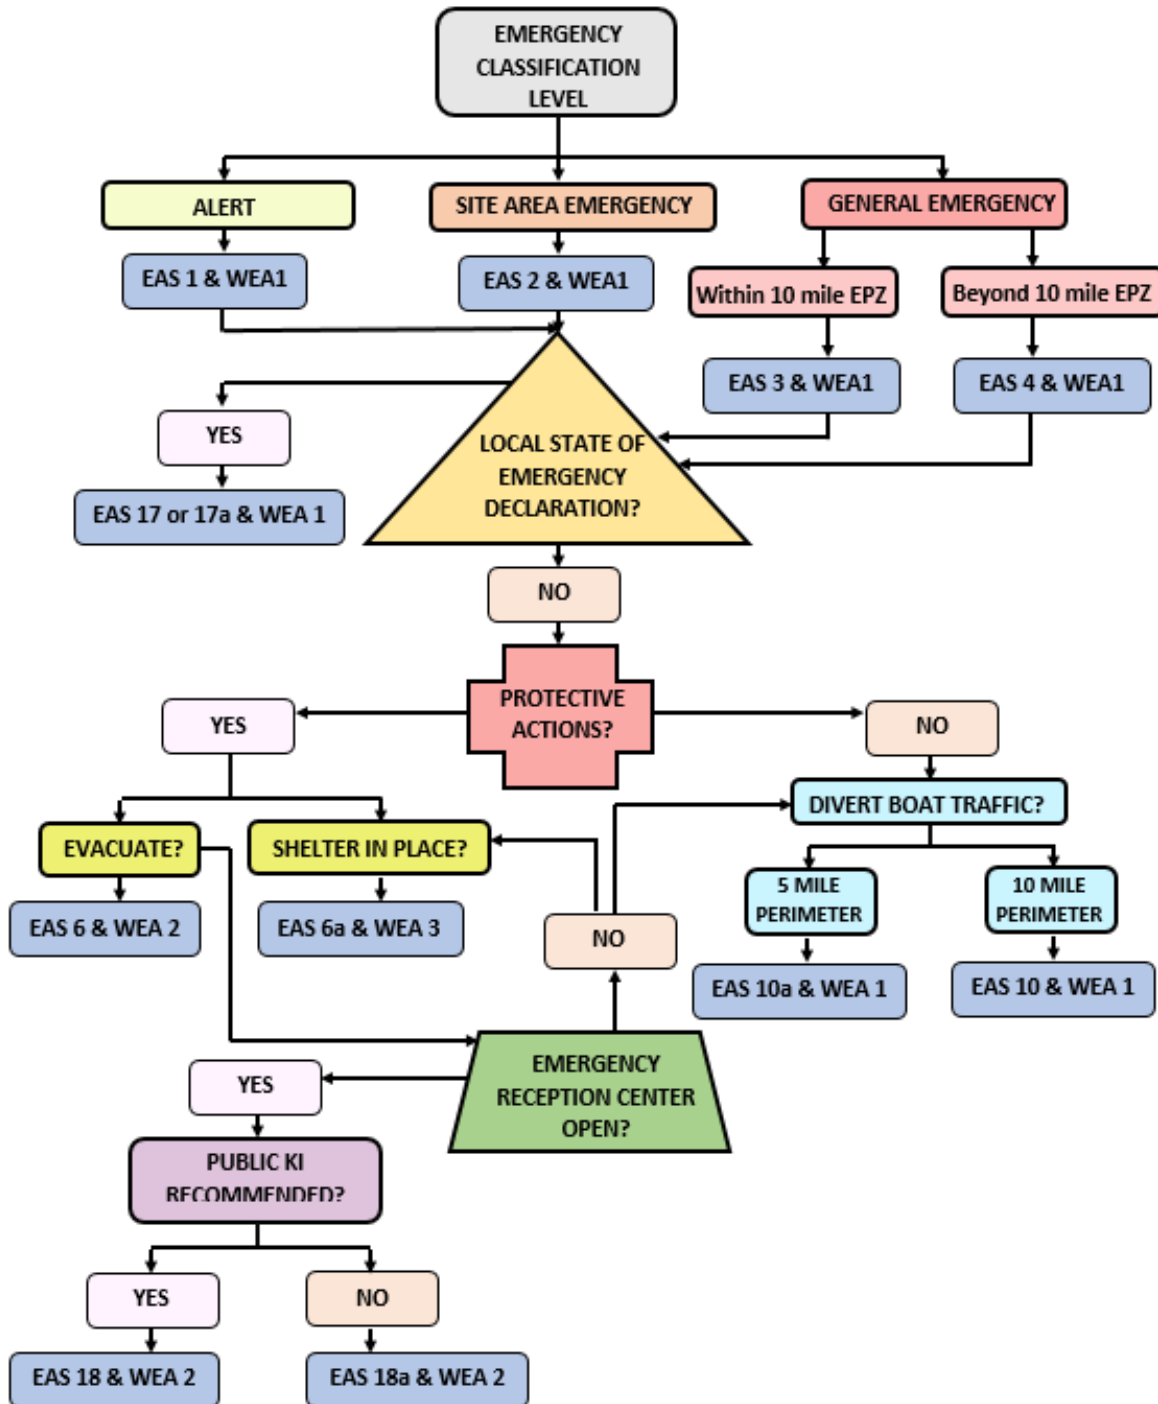

- 6.1 After the Monroe County decision-maker has identified the applicable EAS message and WEA for dissemination, Miami-Dade and Monroe County will decide upon the time of siren activation/route alerting and EAS and WEA message transmission.

<b>Section:</b>	<b>29</b>	<b>TURKEY POINT</b>
<b>Subject:</b>	<b>1800</b>	<b>PROTECTIVE ACTION DECISIONS</b>
<b>Date:</b>	<b>2/20/2020</b>	

- 6.2 The Monroe County PIO at the EOF shall:
- Confirm the number of the selected EAS and WEA messages and press releases.
  - Confirm the time the messages will be disseminated.
- 6.3 Immediately after the conference call the Monroe County PIO shall:
- i. Prepare the appropriate EAS and WEA messages and press releases.
  - ii. Email the EAS and WEA messages and press releases to the EM Director for verification of information correctness prior to release.
  - iii. Text the Monroe County EM Director to notify them that the EAS and WEA messages and press releases are in their email inbox awaiting approval.
  - iv. Once Monroe County EM Director approval has been received, forward the EAS and WEA messages to the Tavernier EOC PIO Liaison.
  - v. Email press release to media outlets.
  - vi. Update Monroe County social media accounts and website.
  - vii. Prepare talking points in preparation for a press briefing.
- 6.4 The Tavernier EOC PIO Liaison shall:
- i. Log in to Everbridge Alert Monroe and send out the approved EAS and WEA messages to the correct geographical area via IPAWS at the predetermined time in coordination with Miami-Dade. If the agreed upon dissemination time cannot be met, notify the PIO team at Miami-Dade so that a new transmission time can be decided.
  - ii. Notify the IC when the EAS and WEA messages have been sent.
  - iii. Upload disseminated press releases to WebEOC.

**ALERT DECLARED AT TURKEY POINT NUCLEAR POWER PLANT**

An **Alert** has been declared at the Turkey Point Nuclear Power Plant effective at \_\_\_\_\_ (TIME).

An Alert Status does not indicate an immediate threat to the Monroe County population. All persons in the Turkey Point Emergency Planning Zone (ten miles around the Turkey Point Nuclear Power Plant) should stay tuned to a local radio station for instructions and emergency information.

In response to the emergency at Turkey Point Nuclear Power Plant, Monroe County Emergency Management has ordered that all persons in the Turkey Point Emergency Planning Zone (ten miles around the Turkey Point Nuclear Power Plant) should stay tuned to a local radio station for instructions and emergency information.

Keep your radio tuned to one of the following stations:

WFKZ-103.1 FM\*

WCTH-100.3 FM

WWUS- 104.1 FM

WIOD- 610 AM

WKEZ-96.9 FM

WORZ- 104.3 FM

WLRN- 91.3 FM

\* Primary Emergency Alert System station.

Review the postcard entitled "Important Safety Information for Neighbors" which was mailed to your residence, or view online at [www.fpl.com](http://www.fpl.com).

All marine interests should monitor channel 16 (156.80 MHz) or NOAA Weather Radio (162.55 MHz) for the latest U.S. Coast Guard advisories regarding blockade or evacuation procedures in the event they become necessary.

The Monroe County Information Hotline has been activated and remains ready to answer public inquiries. Persons in Monroe County may call the Information Hotline at **1-800-955-5504**

**Repeat:** There is no threat to public safety at this time. You will be notified immediately should public action become necessary.

**NOTE TO MEDIA:** Please be sure that all visual media channels are providing these messages with closed captioning or deaf accessible formats.

*Monroe County officials are closely monitoring the situation at the Turkey Point Nuclear Power Plant and will issue further advisories as they become necessary.*

*Visitors and residents of Monroe County are urged to monitor this situation closely through local media outlets.*

**PROTECTIVE ACTION INSTRUCTIONS**

In response to the emergency at Turkey Point Nuclear Power Plant, Monroe County Emergency Management has ordered the following protective actions:

1. All persons within a ten (10) mile radius of Turkey Point Nuclear Power Plant should leave the area immediately. The evacuation area includes Zone 10, the Ocean Reef Community.
2. Public and recreational facilities in Zone 10 have been closed.
3. All boat traffic within a ten (10) mile perimeter of Turkey Point has been diverted from the area.

Drivers are advised to close car windows, turn off car fans/vents, and use air conditioning. Keep your radio tuned to one of the following stations:

**PROTECTIVE ACTION INSTRUCTIONS**

In response to the emergency at Turkey Point Nuclear Power Plant, Monroe County Emergency Management has ordered the following protective actions:

1. All Monroe County citizens within a ten (10) mile radius of Turkey Point Nuclear Power Plant need to seek in-place shelter in a building with windows and doors closed. This area includes Zone 10, the Ocean Reef Community.
2. Public and recreational facilities in Zone 10 have been closed.
3. All boat traffic within a ten (10) mile perimeter of Turkey Point has been diverted from the area.

Drivers are advised to close car windows, turn off car fans/vents, and use air conditioning. Keep your radio tuned to one of the following stations:

WFKZ-103.1 FM*	WCTH-100.3 FM	WWUS- 104.1 FM	WIOD- 610 AM
WKEZ-96.9 FM	WORZ- 104.3 FM	WLRN- 91.3 FM	

\* Primary Emergency Alert System station.

Review the postcard entitled "Important Safety Information for Neighbors" which was mailed to your residence, or view online at [www.fpl.com](http://www.fpl.com).

The Monroe County Information Hotline has been activated and remains ready to answer public inquiries. Persons in Monroe County may call the Information Hotline at **1-800-955-5504**

**ADDITIONAL INFORMATION:** Residents and visitors in the area instructed to seek in-place shelter are not subject to a direct hazard. However, these persons should stay tuned to radio and/or television broadcasts for further bulletins. To avoid exposure, close windows and doors and turn off all fans. If necessary, use air conditioning unless instructed otherwise. If you must go outdoors, cover your mouth and nose with a damp or dry cloth.

**NOTE TO MEDIA:** The Emergency News Center (ENC) at Florida Power and Light has been activated. Media calls concerning the Turkey Point Incident should be directed to **(305) 552-4506**. Also, please be sure that all visual media channels are providing these messages with closed captioning or deaf accessible formats.
